An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas R. Arno on 7/22/09.

The application has been amended as follows:

In claim 28 line 6 before “;” – , to emit an ultrasound field into said compartment – has been inserted.

In the specification on page 4 paragraph [0022] lines 1, 3, and 6 “2” has been changed to -20 -.

In the title “DEVICE AND” has been deleted.

The following is an examiner's statement of reasons for allowance: The primary reason for allowance of the claims is the recitation that the method includes the combination of placing a compartment containing the physiological fluid in a water bath, and emitting the gas microbubbles and the ultrasound field into the compartment to induce the programmed cell death at the frequency, power level and temperature. This combination is not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
